## **JEP Capital, Inc, Charlotte NC — *Engineering Department Manager***

**Languages:** Coldfusion, PHP, Node, ReactJS, BASH, DevOps

**Framework/Platform:** Laravel, ReactJS, Bulba, Foundation, Coldbox, AWS

Sept 2018 - PRESENT

Currently building new implementation enterprise level application solutions in multiple full-stack languages. Beyond new implementation work I also remediate and refactor on large scale problematic full-stack systems that have reached their single purpose life cycle and need to be built more open ended for future scalability and productivity.

## **Visiture, Charleston SC — *Full-Stack Engineer***

**Languages:** Javascript, PHP, SCSS, HTML

**Framework/Platform:** Magento 1EE, Magento 2EE, Shopify+, Wordpress,

March 2018 - Sept 2018

Full stack debugging and new feature development/integration as part of a new development division of Visiture LLC. Handled client interactions and project management needs for feature development along with bug remediation and new feature work.

## **Webflute, Remote (contract) — *Full-Stack Engineer***

**Languages:** Javascript, PHP, SCSS, HTML

**Framework/Platform:** Magento 1EE, Magento 2EE, Bootstrap, Foundation

Feb 2017 - Jan 2018

From design to PHP, JS, module/site development and integration systems. Worked daily in Adobe Creative Suite, PHP module development, JS behavioral functionality and SCSS stylings. Also, developed automated deployments through Jenkins+Github

## **Comcast/Gearstream, Remote (contract) — *Lead Front-End Architect***

**Languages:** Javascript, Clojure

**Framework/Platform:** ReactJS, Metabase

Feb 2017 - Jul 2017

Project consultant for an internal initiative. Developed a BI analytics systems with Clojure/ReactJS and a testing harnesses for automated QA systems for a project prospect venture contract.

## **Blue Acorn, Charleston SC — *Front-End Developer / QA Automations Developer***

**Languages:** Javascript, PHP, SCSS, HTML

**Framework/Platform:** Magento 1EE, Magento 2EE, Bootstrap, Foundation

Dec 2015 - Mar 2017

Lead developer for globalization projects and ADA compliance design and implementations. While a FE developer I transitioned into automated QA and led the first initiative Blue Acorn ever greenlit for automated QA systems using CucumberJS

## **The E Group, Columbia SC — *Full-Stack Engineer***

**Framework/Platform:** Magento 1EE, Joomla, Wordpress, Custom Framework

Aug 2007 - Dec 2015

Full service/stack development of new implementations, maintenance of previously implemented and custom features for personal projects, small business' and enterprise level e-commerce solutions.
